This Quote is for Phase two of development. The end goal of phase two will be to have an online competition platform created.

This platform will give the administrator:

- the ability to create competitions (this includes adding quizzes to the competitions to structure them)
- the ability to create practice quizzes that are not included in competitions
- the ability to create quizzes (be able to add four(eg, MCQ, True or False, etc.) different types of questions to each quiz, add images to questions, etc.)

This platform will give the user the ability to:

- attempt quizzes with an interactive and smooth interface.
- view the results of their quiz in a quiz checker interface, with explanations and trend analysis
- take part in competitions that will have a certain end date and be part of that competitions' leaderboard
- buy practice quizzes and competitions participation online.

NOTE: I've added the Google Analytics integration for free because although it is required, I already have code to integrate it from before!
